

PHOTOGRAPHY WEBSITES WORTH EXPLORING

There are several excellent newsletters that can help expand your photographic knowledge, skills, and vision. These newsletters often provide tips, inspiration, and deep dives into the art of photography. Here are a few of the better ones.

1. Fstoppers

- **What it offers:** Fstoppers is one of the most popular photography websites, and their newsletter is packed with tutorials, gear reviews, photography techniques, and inspiring stories. It's ideal for photographers looking to enhance their technical skills and stay up to date with the latest trends.
- **Why it's great:** Fstoppers covers both beginner and advanced topics, often with contributions from renowned photographers.
- **Web Site:** <https://fstoppers.com>

2. The Photo Brigade

- **What it offers:** The Photo Brigade offers a mix of gear reviews, photography tips, industry news, and interviews with professional photographers. It's a great resource for photographers wanting to stay updated on the latest gear and trends while improving their craft.
- **Why it's great:** It provides a balanced view of both technical and creative photography, with an emphasis on storytelling.
- **Web Site:** <https://www.facebook.com/PhotoBrigade>

3. PetaPixel

- **What it offers:** PetaPixel's newsletter delivers a mix of photography news, tutorials, inspirational work, and in-depth gear reviews. The site covers a wide range of photography styles and provides practical advice for improving your skills.
- **Why it's great:** It's highly informative, catering to all levels of photographers, with a strong emphasis on keeping photographers informed about industry trends.
- **Web Site:** <https://petapixel.com>

4. DIY Photography

- **What it offers:** DIY Photography's newsletter focuses on both gear and techniques, with a particular emphasis on creative, hands-on approaches to photography. You'll find everything from lighting tips to DIY hacks that help you get the most out of your gear and budget.
- **Why it's great:** It's excellent for those who want to explore unconventional techniques and get more creative with their photography.
- **Web Site:** <https://www.diyphotography.net>

5. The Photographers' Ephemeris

- **What it offers:** This newsletter is a fantastic resource for landscape photographers. It provides tips on lighting, shooting at various times of the day, and planning shoots based on the sun and moon's position.
- **Why it's great:** Perfect for expanding your vision and understanding of natural light, this newsletter can help you plan shoots that optimize natural conditions.
- **Web Site:** <https://photoephemeris.com>

6. LensCulture

- **What it offers:** LensCulture is focused on inspiring photographers by showcasing powerful stories and images from around the world. They offer newsletters with artist spotlights, photography exhibitions, and opportunities for emerging photographers.
- **Why it's great:** It's great for photographers looking to expand their creative vision and explore the work of others in the art world.
- **Web Site:** <https://lensculture.com>

7. CreativeLive Photography

- **What it offers:** CreativeLive offers workshops and tutorials in many areas of photography. Their newsletter provides updates on upcoming classes, special offers, and highlights from their photography experts.
- **Why it's great:** If you want to learn new skills from top photographers, CreativeLive offers highly structured, in-depth learning that you can implement right away.
- **Web Site:** <https://creativelive.com>

8. Digital Photography School

- **What it offers:** This newsletter offers tips, tutorials, and advice aimed at improving your photography technique. It covers everything from beginner basics to more advanced concepts, focusing on making your photos stand out.
- **Why it's great:** It's practical, easy to understand, and offers regular challenges and inspiration to help you grow.
- **Web Site:** <https://digital-photography-school.com>

9. Aperture

- **What it offers:** Aperture offers a newsletter with photography features, exhibition news, and reviews. It has a fine-art focus, making it ideal for photographers who want to deepen their understanding of photography as an art form.
- **Why it's great:** This one is great for photographers looking to expand their creative and conceptual approach to photography.
- **Web Site:** <https://aperature.org>

DECIDING WHICH WEB SITE IS BEST FOR YOU

1. Digital Photography School

Best for: Beginners and early enthusiasts

Why it stands out:

Digital Photography School excels at explaining photography fundamentals in a clear, non-intimidating way. Topics such as exposure, composition, lighting, and basic editing are broken down into practical, easy-to-apply lessons.

Best stage of development:

- New photographers
- Enthusiastic amateurs building confidence
- Anyone wanting straightforward guidance without jargon

Primary strength:

Foundational skills and steady, confidence-building progress.

2. PetaPixel

Best for: Developing and intermediate photographers

Why it stands out:

PetaPixel provides a strong balance of **technique, gear knowledge, industry news, and inspiration**. It helps photographers understand *why* things work, not just *how*, and keeps them current with trends and evolving practices.

Best stage of development:

- Photographers comfortable with basics
- Those refining technique and decision-making
- Curious learners wanting to stay informed

Primary strength:

Broad photographic literacy and informed growth.

3. Fstoppers

Best for: Intermediate to advanced photographers

Why it stands out:

Fstoppers dives deeper into **lighting, composition, post-processing, and professional workflows**. Content is often more opinionated and detailed, making it ideal for photographers ready to challenge their habits and raise their technical standards.

Best stage of development:

- Serious amateurs
- Advanced hobbyists
- Photographers interested in studio, portrait, or commercial techniques

Primary strength:

Technical mastery and disciplined improvement.

4. LensCulture

Best for: Advanced photographers and artistic growth

Why it stands out:

LensCulture shifts the focus from *how to shoot* to *why photographs matter*. It emphasizes storytelling, personal vision, and contemporary photography as an art form through portfolios, interviews, and exhibitions.

Best stage of development:

- Experienced photographers
- Those exploring personal style and meaning
- Anyone interested in photography as visual expression

Primary strength:

Creative vision, inspiration, and photographic “seeing.”

How These Four Work Together

- **Digital Photography School** builds the foundation
- **PetaPixel** broadens knowledge and awareness
- **Fstoppers** sharpens technique and craft
- **LensCulture** deepens vision and artistic intent

Each of these newsletters can provide you with valuable resources, and subscribing to a combination of them can help you balance your creative vision, technical growth, and understanding of photography.
