Setting up **Be My Eyes** on your Ray-Ban Meta smart glasses allows you to make hands-free video calls to sighted volunteers using your glasses' camera and open-ear speakers.

Prerequisites

1. **Be My Eyes App:** Download the **Be My Eyes** app on your iOS or Android phone, log in, and register as someone needing visual assistance.
2. **Meta View App:** Ensure your glasses are paired and connected to the **Meta View / Meta AI** app.
3. **Audio Settings (iPhone Users):** Go to your iPhone's **Settings** > **Accessibility** > **Touch** > **Call Audio Routing** and make sure it is set to **Automatic**.

Step-by-Step Setup

1. **Open the Meta App:** Launch the Meta View / Meta AI app on your phone while logged into your Meta account.
2. **Navigate to Device Settings:** Tap **Glasses** (or the device icon) in the top right corner, then tap **Device settings**.
3. **Select Be My Eyes:** Scroll down and select **Be My Eyes**.
4. **Connect the App:** Tap **Connect Be My Eyes**. This will automatically redirect you to the Be My Eyes app on your phone.
5. **Confirm Link:** Tap **Connect** inside the Be My Eyes app to grant permission and finish pairing.

How to Use Be My Eyes Hands-Free

Starting a Call

To connect with a sighted volunteer, make sure your glasses are on and connected via Bluetooth to your phone. Simply say aloud:
"Hey Meta, Be My Eyes" *(Alternative commands: "Hey Meta, call a volunteer with Be My Eyes" or "Hey Meta, call Be My Eyes")*
Your glasses will initiate a live one-way video / two-way audio call through your open-ear speakers.

Tips During the Call

- **Camera Location:** The camera used for video streaming is on the **left side** of the frames near the hinge. Point your head naturally toward what you want described.
- **Switching Devices:** Double-tap the **capture button** (the button on top of the right temple arm) during a call to switch the camera, mic, and speakers between your glasses and your smartphone.
- **Ending the Call:** Double-tap the **touchpad** on the side of the right temple arm, or end the call from your phone screen.
